

Açelya LEJEUNE

Senior Digital Designer & Frontend Developer

Designer senior avec une solide expérience en communication visuelle, branding et projets web, je m'oriente aujourd'hui vers le développement front-end. J'ai travaillé en Turquie, à Chypre du Nord, au Royaume-Uni et en Belgique, ce qui m'a permis de développer un sens affirmé de la mise en page, de la typographie, de l'identité visuelle, de la hiérarchie graphique et des interfaces digitales responsives.

En 2025, j'ai terminé une formation de deux ans en développement front-end à l'IFAPME de Liège, en Belgique. Mes points forts sont le SCSS, les interfaces responsives, l'intégration UI, les workflows Git/GitHub, les projets web basés sur des CMS et la qualité visuelle des interfaces utilisateur. J'ai également complété des certifications professionnelles en UI/UX Design et en développement IA. Je recherche aujourd'hui un poste où je peux combiner mon expérience créative avec mes compétences en développement front-end.
